

# Mooroolbark Car Park Concept Plan

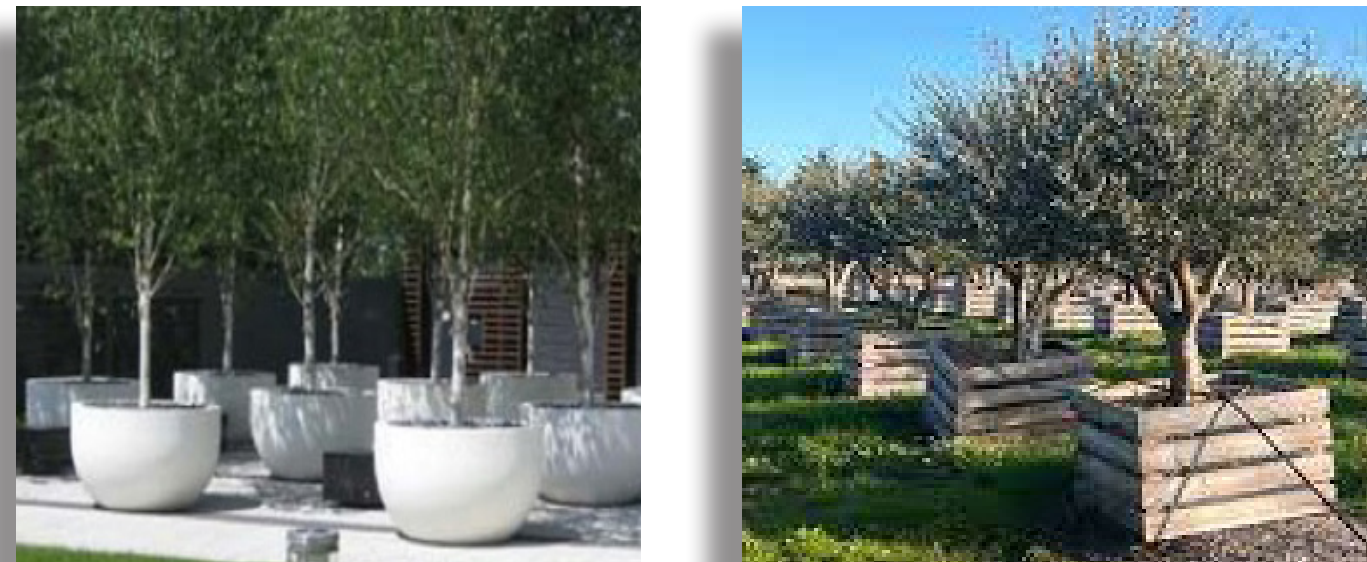

With the completion of the multilevel car park that supports the Mooroolbark Station, the car park at the corner Charles and Station Street has become redundant and represents an opportunity for the creation of an exciting pop-up activity center. This concept aims to activate the space with a large community garden space, fruit tree forest, community composting zone and shipping container storage zone amongst other activity and leisure areas.

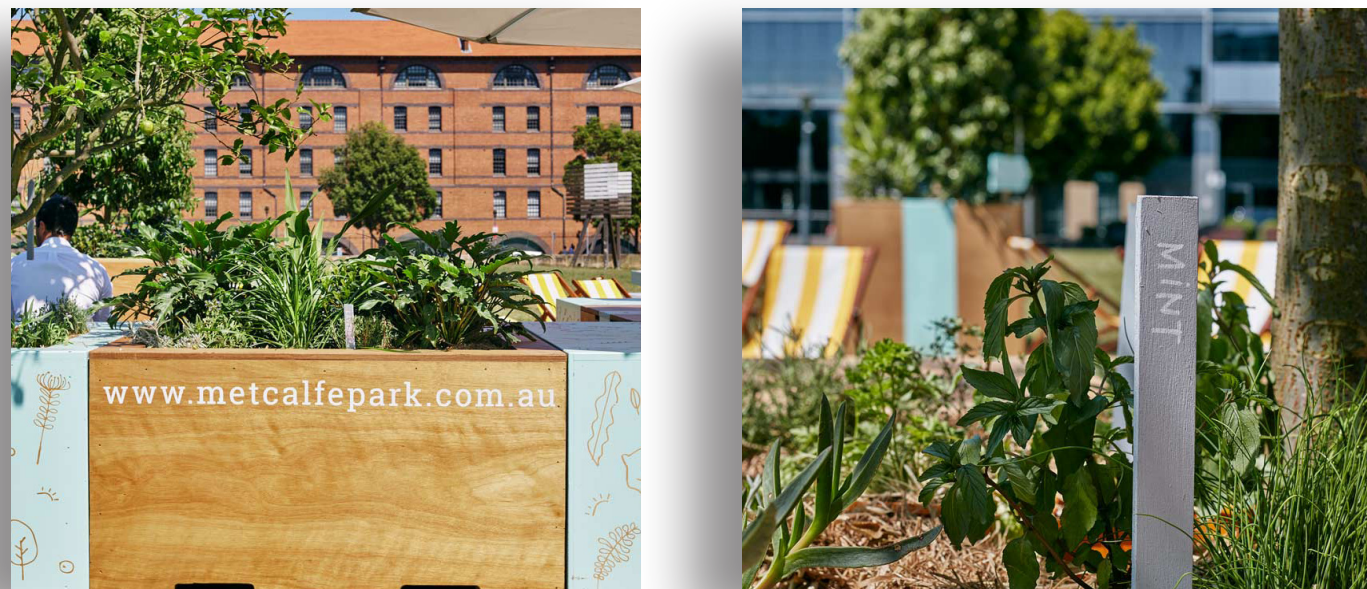

Composting Zones/Materials Bay/ Organics Area

Shipping Container Storage Space

Urban Orchard

Raised Planter Beds

Outdoor Seating Area

Future Shelter Zone

Polytunnels

Painted Jersey Barriers
